# **New JV to Address CO2 Opportunity**

Provaris has entered into a new joint venture with partner Yinson Production, augmenting the existing joint development agreement and building a vehicle to take on the CO2 storage and transport market. The move follows Yinson's signing of a MoU with "K" Line Energy Shipping for a floating storage and injection unit and CO2 carrier, demonstrating the near term opportunity for solutions in the CO2 market.

### 50/50 JV with Yinson

Provaris has completed the phase 2 design stage of its liquid CO2 tank and this has now been submitted to a marine classification society for approval. With this important milestone passed, Provaris has now entered into a joint venture with partner Yinson Production, augmenting the existing joint development agreement to position both companies in a single vehicle that will be a leading innovator in CO2 storage and maritime transport. The next stage will be a front end engineering and design (FEED) process which will start in Q3 this year.

### **Share Issue to Yinson**

The 50/50 joint venture will hold the exclusive rights to the tank design, fabrication methodology and all future intellectual property for tank designs. As part of the deal, Provaris will issue 10m new ordinary shares to Yinson at no cost in return for Yinson's contribution of commercial, technical and market support to the JV from the entire Yinson Group. We have assumed this will impact our forecasts from FY 26 onwards. While this has a small dilution impact it is within rounding and does not change our central valuation of A\$0.13 per share.

### **Development Comes as Yinson Agrees Key CO2 MoU**

The JV move follows on from a MoU announced yesterday between Yinson and "K" Line Energy Shipping to jointly develop and market a floating storage and injection unit (FSIU) and a liquefied CO2 carrier This will mainly target carbon capture and storage projects under development in Europe. A key part of the FEED stage for the Provaris tank will be to incorporate the tank design into the FSIU under development by Yinson.
